SportsHub: Use Case Description

Use Case Number: 1		
Name: User Account Management		
Brief Description: This use case allows users to register, view, update, and delete their SportsHub account.		
Actors: Guest User, Registered User		
Preconditions: The user has internet connectivity. For viewing, updating, or deleting a profile, the user must be logged into the system.		
Flows of Events:		
1.1.0 Create User Account		
Step	User Actions	System Actions
1	The guest user selects the Create Account command.	The system displays the registration form containing first name, last name, email, password, and confirm password.
2	The user enters the required information and requests the system to save the details.	The system verifies that no account exists with the same email address, creates the account, and displays a success message. If the email already exists, the system displays a duplicate account message.
Postconditions: The user account is persisted in the system.		
Business Rules: Each email address must be unique.		
1.1.1 Read/View User Profile		

Step	User Actions	System Actions
1	The user selects My Profile.	The system displays the user's profile information.
2	The user views the profile.	The system displays the user's name, email, favorite teams, and notification preferences.
Postconditions: The user profile has been viewed.		
1.1.2 Update User Profile		
Step	User Actions	System Actions
1	The user selects Edit Profile.	The system displays an editable profile form populated with the current user information.
2	The user updates the desired information and requests the system to save it.	The system validates the information, updates the profile, and displays a success or failure message.
Postconditions: The user profile is updated.		
Business Rule: The email address cannot be changed.		
1.1.3 Delete User Account		
Step	User Actions	System Actions
1	The user selects Delete Account.	The system displays a confirmation dialog.
2	The user confirms the deletion request.	The system deletes the account and displays a success message.
Postconditions: The user account is deleted.		

Business Rule: Only authenticated users can delete their own account.		
Use Case Number: 2		
Name: Manage Favorite Teams		
Brief Description: This use case allows users to add, view, and remove favorite teams to personalize their SportsHub experience.		
Actors: Registered User		
Preconditions: The user must be logged into the system.		
Flows of Events:		
2.1.0 Add Favorite Team		
Step	User Actions	System Actions
1	The user searches for a team.	The system displays matching teams.
2	The user selects Add to Favorites.	The system saves the selected team and confirms the addition.
Postconditions: The selected team is added to the user's favorites.		
Business Rule: A team cannot be added more than once		
2.1.1 View Favorite Teams		
Step	User Actions	System Actions
1	The user opens Favorite Teams.	The system displays all favorite teams.
2.1.2 Remove Favorite Team		
Step	User Actions	System Actions

1	The user selects Remove for a favorite team.	The system removes the team from the favorites list and displays a success message.
Postconditions: The team is removed from the user's favorites.		
Use Case Number: 3		
Name: View Live Matches		
Brief Description: This use case allows users to view currently active live matches and basic match information.		
Actors: Registered User		
Preconditions: The user must be logged into the system.		
Flows of Events:		
3.1.0 View Live Matches		
Step	User Actions	System Actions
1	The system displays match teams, scores, match time, competition name, and match status.	The system retrieves the list of currently active matches.
2	The user views the live match list.	The system displays match teams, scores, match time, competition name, and match status.
Postconditions: The live match list is displayed to the user.		
Business Rule: Only matches currently in progress should appear in the live matches section.		
3.1.1 Filter Live Matches		
Step	User Actions	System Actions
1	The user selects a competition, team, or sport filter.	The system filters the live match list based on the selected criteria.

2	The user views the filtered results.	The system displays only the live matches that match the selected filter.
Postconditions: Filtered live matches are displayed.		
Business Rule: If no match satisfies the filter, the system should display a “No live matches found” message.		
Use Case Number: 4		
Name: View Match Details		
Brief Description: This use case allows users to view detailed information about a selected match.		
Actors: Registered User		
Preconditions: The user must be logged into the system and the selected match must exist.		
Flows of Events:		
4.1.0 View Match Details		
Step	User Actions	System Actions
1	The user selects a match from the match list.	The system retrieves detailed information for the selected match.
2	The user views the match details.	The system displays teams, score, match time, competition, venue, match events, and match statistics.
Postconditions: The selected match details are displayed.		
Business Rule: The system must only display match details for valid matches available in the system.		
4.1.1 View Match Events		
Step	User Actions	System Actions

1	The user selects the Events section of a match.	The system retrieves the match timeline.
2	The user views the match events.	The system displays goals, cards, substitutions, and other available match events.
Postconditions: The match events are displayed.		
Use Case Number: 5		
Name: Ticket Search		
Brief Description: This use case allows users to search for tickets for upcoming sports events and access official ticket provider links.		
Actors: Registered User, Ticket Provider		
Preconditions: The user must be logged into the system and the selected match must be an upcoming event.		
Flows of Events:		
5.1.0 Search Tickets		
Step	User Actions	System Actions
1	The user selects the Tickets command.	The system displays the ticket search page.
2	The user enters search criteria such as team name, competition, location, or date.	The system searches for matching upcoming events.
3	The user submits the search request.	The system displays available ticket results from the ticket provider.
Postconditions: Matching ticket results are displayed.		
Business Rule: Tickets should only be shown for upcoming events.		
5.1.1 View Ticket Details		

Step	User Actions	System Actions
1	The user selects a ticket result.	The system displays ticket details such as event name, venue, date, time, provider, and availability.
2	The user reviews the ticket details.	The system provides an option to continue to the ticket provider.
Postconditions: Ticket details are displayed.		
5.1.2 Redirect to Ticket Provider		
Step	User Actions	System Actions
1	The user selects Buy Ticket.	The system redirects the user to the official ticket provider website.
2	The user continues the purchase outside SportsHub.	The ticket provider handles ticket purchase and payment processing.
Postconditions: The user is redirected to the external ticket provider.		
Business Rule: SportsHub does not process ticket payments directly.		
Use Case Number: 6		
Name: Manage Featured Tournaments		
Brief Description: This use case allows the administrator to select and arrange the most important tournaments for a specific period. The selected tournaments will be displayed first to users, with their fixtures grouped under each tournament.		
Actors: Administrator		
Preconditions: The administrator must be logged into the system.		
Flows of Events:		
6.1.0 Select Featured Tournaments		

Step	User Actions	System Actions
1	The administrator selects the Featured Tournaments command.	The system displays a list of available tournaments and competitions.
2	The administrator selects the tournaments that should be featured for the current period.	The system marks the selected tournaments as featured.
3	The administrator requests the system to save the selection.	The system saves the featured tournament list and displays a success message or a failure message on exception.
Postconditions: The selected tournaments are saved as featured tournaments.		
Business Rule: Only existing tournaments can be selected as featured tournaments.		
6.1.1 Arrange Featured Tournaments		
Step	User Actions	System Actions
1	The administrator opens the selected featured tournament list.	The system displays the selected tournaments in their current display order.
2	The administrator rearranges the tournaments based on importance or priority.	The system updates the tournament order based on the administrator's arrangement.
3	The administrator requests the system to save the new order.	The system saves the tournament priority order and displays a success message.
Postconditions: The featured tournaments are arranged in the order selected by the administrator.		
Business Rule: Featured tournaments must be displayed to users according to the saved administrator-defined order.		

6.1.2 View Featured Tournaments and Fixtures		
Step	User Actions	System Actions
1	The user opens the fixtures or matches page.	The system retrieves the featured tournaments for the current period.
2	The user views the page.	The system displays the featured tournaments first, in the order arranged by the administrator.
3	The user selects a featured tournament.	The system displays the fixtures grouped under the selected tournament.
Postconditions: The user sees important tournaments first, with fixtures displayed under each tournament.		
Business Rule: Fixtures must be grouped under their corresponding tournament.		
6.1.3 Remove Featured Tournament		
Step	User Actions	System Actions
1	The administrator opens the featured tournament list.	The system displays all tournaments currently marked as featured.
2	The administrator selects a tournament to remove from the featured list.	The system removes the tournament from the featured list.
3	The administrator requests the system to save the changes.	The system saves the updated featured tournament list and displays a success message.
Postconditions: The removed tournament is no longer displayed as a featured tournament.		
Business Rule: Removing a tournament from the featured list does not delete the tournament or its fixtures from the system.
